Proud Developer & Innovative Engineering Nerd

My mission is simple, I intend to hit the ground running with my skillset to tackle your company's problems. If I don't know the answer to a question, I sure know where to find one. I'm self reliant, creative and passionate about my work.

Education

General Assembly October 2019 - January 2020
Software Engineer Immersive

Skyline College August 2009- May 2012
Interdisciplinary Studies, AA

Projects And Experience

Software Engineer Fellow July 2020 - September 2020
Moringa Fellowship

Project: Cafecito B2B Project

- Maintained and improved frontend React code by working with the design team to create a new UI.
- Was the sole engineer in charge of all frontend changes for this project.
- Followed contributing guidelines such as BEM CSS, making proper API calls, and using ESLint to write code on top of Cafecito's legacy code.

Frontend Intern May 2020 - August 2020
Esports Development League

Project: ESDL Placement Tool

- Worked closely with the CEO and CTO to create a UI giving admins the ability to rearrange teams by drag and drop using Sortable.js.
- Manipulated large amounts of data coming in JSON format.
- Built the UI using React frontend.

Software Engineer December 2019 - March 2020
2720 miles

Project: ESDL Placement Tool

- Single handedly worked with the company to build a full stack eCommerce web app using React, JavaScript, Node, Express, PostgreSQL, and AWS S3.
- Hosted the application in a Virtual Machine on a DigitalOcean droplet.
- Used Paypal API's to securely allow a payment process from customer to client.
